14	Weeder batteries/ electric operated	2	600 W 40 cm Electric Grass Trimmer, Grass Cutting Machine for Agriculture, FEGT-1400 also known as a string trimmer or weed eater, is a versatile outdoor power tool designed for trimming grass, weeds, and other vegetation in areas where a lawnmower may not reach effectively. It consists of a long shaft with a cutting head at the bottom, powered by an engine or motor. Instead of using a solid blade, grass trimmers utilize a flexible monofilament line (often nylon) that rotates at high speed to cut through vegetation. Key Features of a Grass Trimmer: Shaft: The shaft of a grass trimmer is typically made of lightweight materials such as aluminum or reinforced plastic. Some models have adjustable shafts to accommodate different user heights or to convert between trimming and edging modes. Cutting Head: The cutting head is located at the end of the shaft and houses the cutting mechanism. It may be a bump-feed head that releases more line when tapped on the ground, an automatic feed system, or a fixed-line head. Cutting Line: Instead of a blade, grass trimmers use a cutting line, usually made of nylon. The line rotates at high speed, cutting through grass and weeds. The cutting line is replaceable and comes in various thicknesses and shapes. Engine/Motor: Grass trimmers can be powered by gasoline engines, electric motors (corded), or rechargeable batteries (cordless). Gasoline-powered trimmers offer mobility, while electric models are generally quieter and require less maintenance. Handle and Controls: Grass trimmers have handles for control and maneuvering. Some models feature adjustable handles for enhanced comfort. Controls include a trigger or switch for starting and stopping the trimmer. Safety Guard: A safety guard or shield is often present around the cutting head to protect the user from debris thrown by the trimmer. Edging Capability: Many grass trimmers can be rotated or adjusted to function as edgers, allowing users to create clean edges along sidewalks and driveways. Common Uses of a Grass Trimmer: Trimming Grass: Grass trimmers are designed for precisely cutting grass in areas where lawnmowers may not reach, such as around trees, fences, and landscaping features. Weed Control: Trimmers are effective at cutting and controlling weeds in various settings, including gardens, flower beds, and along pathways. one extra batteries
